As tur prices rise, states told to monitor stocks

SANJEEB MUKHERJEE AND AGENCIES
New Delhi, 12 August

With tur (arhar) sowing down by almost 11.6 per cent this kharif season, the Centre on Friday asked states and Union Territories (UTs) to ensure that stockists and traders disclose quantities of tur dal held by them. The output was down owing to the late onset of monsoon in major-growing states followed by excess rainfall in August, hurting crop prospects.

Sources said traders may be asked to disclose stocks held by them in a centralised portal to ensure smooth monitoring of inventory.

They also said the move — which is meant to control a surge in prices during the festival season — is being interpreted by the market as precursor to stricter measures if prices don't fall in the next few days.

According to the department of consumer affairs, the retail price of tur dal has risen by almost ₹13 per kg in the last one month to around ₹113 per kg (jump of 13 per cent). In some cities, the rise in prices has been in the range of ₹12-20 per kg.

In the initial stages, tur sowing dropped due to delayed onset of monsoon over the major-growing states.

Thereafter, excess rainfall in Karnataka, Maharashtra and Madhya Pradesh (since the end of July) may have impacted the standing crop.

"The Centre wants private stocks held with traders to come into the market

Traders may be asked to disclose stocks held by them in a centralised portal to ensure smooth monitoring of inventory

before the festival demand sets in. This will help prevent any unusual spike in prices," a market participant said.

According to an official statement, the government is monitoring the prices of pulses closely. Currently, it has around 3.8 million tonnes in its buffer and this is being released to boost domestic supply.

On Friday, the department of consumer affairs issued a "directive to all states and UTs to enforce stock disclosure by stockholders of tur under Section 3(2)(h) and 3(2)(i) of the Essential Commodities Act, 1955." States and UTs have also been told to monitor and verify the stocks.

Besides, they have been asked to direct stockholder entities to upload the data of stocks held by them on the department's online monitoring portal on a weekly basis, the statement said.

"There are reports that some sections of stockists and traders are resorting to restricted sales in an attempt to create artificial scarcity to push the price upward," it added.

"The Centre is closely watching the overall availability and prices of pulses in the domestic as well as overseas markets. It may take necessary pre-emptive measures in an event of unwarranted price rise in the upcoming festival months," the statement said.

Paddy sowing almost 15% less than last year

SANJEEB MUKHERJEE
New Delhi, 12 August

Acreage under paddy, the main food grain grown during the kharif season, continued to be almost 15 per cent less than the same period last year, raising concerns of an at least 10-12 million tonnes (mt) drop in production. The acreage has been down due to scanty rainfall in the main paddy-growing states of Uttar Pradesh, Bihar, Jharkhand, West Bengal, and Odisha. Together, the five states account for more than 40 per cent of India's total annual rice production, which is estimated to be over 120 mt.

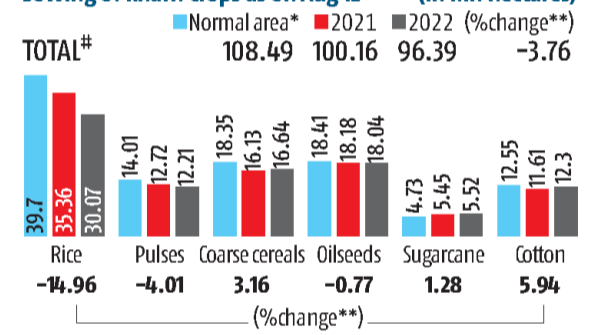

With around 24 per cent of normal average area in which paddy is grown every year remaining un-sown till August 12, there is very lim-

ited chance of a big uptick in output as compared to last year, trade and market sources felt. In the previous kharif season, India produced over 111 mt of rice.

In several states, farmers have moved on to other short duration crops, such as pulses and coarse cereals abandoning paddy. According to the India Meteorological Department (IMD), between June 1 to August 12, cumulatively across the country the southwest monsoon is around 8 per cent more than normal but in major paddy growing states of UP (-44 per cent), West Bengal (-21 per cent), Jharkhand (-41 per cent), and Bihar (-38 per cent). In Telangana, which is another major paddy-growing state, crops have been damaged due to excess rains (+78 per cent).

Inflation...

"The slowdown in consumer inflation for the third consecutive month suggests that inflationary pressures, though elevated, are on a downward trend. Encouragingly, households' inflation expectations also improved in July, reflecting the effectiveness of the RBI's and the government's efforts to tame inflation," said Rajani Sinha, chief economist, CARE Ratings.

Among sub-groups, inflation in vegetables was 10.90 per cent YoY, against 17.37 per cent in June. The edible oil inflation rate was 7.52 per cent, against 9.36 per cent during the previous month; for meat and fish, it was 3 per cent, against 8.61 per cent in June.

CPI-based inflation for fuel and light was 11.76 per cent in July, down from 10.39 per cent in June. With global oil prices coming down due to fears of a recession in advanced economies, fuel inflation is expected to soften further.

"Many imported components also saw a decline in prices in July, reflecting the lagged pass-through of the moderation in international commodity prices. Today's inflation print provides further evidence that inflation in India has peaked, and will likely moderate in the coming months," said Rahul Bajoria, India chief economist with Barclays.

Still, analysts expect the MPC to go for another round of rate hike. "Given the MPC's focus on anchoring inflation expectations and the RBI governor's statement on bringing inflation closer to the target of 4 per cent over the medium term, we expect another rate hike of 10-35 bps in the September 2022 policy meeting. Thereafter, we believe the MPC decisions shall be

extremely data-dependent," said Aditi Nayar, chief economist, ICRA.

After the latest round of repo rate hike earlier this month, RBI Governor Shaktikanta Das struck a hawkish tone and said with growth momentum expected to be resilient despite headwinds from the external sector, the monetary policy should persevere further in its stance of withdrawal of accommodation to ensure that inflation moves close to the target of 4 per cent over the medium term.

On the factory output front, IIP rose 6.6 per cent in June, when compared with the corresponding month of 2019-20; in May 2022, it had risen just 1.7 per cent over the corresponding month of the pre-Covid period. The deceleration in growth in June when compared to May was because the strong YoY growth figure for that month came on a low base (the country was battling a severe second wave of Covid-19 during May 2021).

If one looks at sequential numbers, IIP remained more or less the same in June at 137.9 points, against 137.7 points in May. From a GDP data point of view, the important figure is cumulative growth in IIP at 12.7 per cent in the first quarter of the current financial year, against 44.4 per cent in Q1 of 2021-22.

However, this represents 4.8 per cent growth during April-June of FY23 over the corresponding pre-Covid period of 2019-20. IIP had declined 6.9 per cent in Q1 of 2021-22 over the Q1 of 2019-20. The GDP data for the first quarter will come towards the end of this month. Further normalisation in the base from July onwards shall give a bit clearer picture in terms of yearly growth in IIP. "As anticipated, the normalising base resulted in a fairly broad-based dampening of IIP growth to 12.3 per cent in June 2022, although this was appre-

cably higher than our forecast of 10.2 per cent, led by the manufacturing sector," Nayar said.

An official press release also cautioned against interpreting the data points on a YoY basis, considering the unusual circumstances on account of the Covid-19 pandemic since March 2020. It is largely the capital goods segment that is taking time to recover. Though it jumped 26.1 per cent YoY in June, growth was just 0.5 per cent versus the pre-Covid period of 2019-20. There was a decline in production in April and May 2022, over the pre-Covid period.

LIC...

VNB is the present value of the future earnings from policies issued during a period. It reflects the additional earnings expected to be generated through the new policies issued. The VNB margin of LIC for the quarter stood at 13.6 per cent, a drop of around 150 basis points from the 15.1 per cent reported in the March quarter. The major reason for the decline in the margin is the product mix.

The group business' proportion in new sales of the corporation increased by 8 per cent and most of it was in funded products, which typically have a lower margin than other group products. "It is temporary. As soon as we raise the mix of non-par products, the margin will go up. But if we sell more funded schemes, the margin will be a drag. So, we will take a call on this going forward," said M R Kumar, chairperson, LIC.

"We would like to clock a margin of 15-16 per cent, so that in five years, we will be on a par with the private life insurers," he said. LIC's total premium was up 20.35 per cent year-on-year (YoY) to ₹98,352 crore in Q1FY23, aided by a 34 per cent jump in the group business premium. The corporation sold

around 3.7 million policies in Q1FY23, up 60 per cent from the same period a year ago (Q1 of last financial year was impacted by the second wave of Covid. Assets under management of the corporation also went up 8 per cent during this period to ₹41.02 trillion.

LIC, which is one of the largest institutional investors in the equity markets, invested ₹46,444 crore on a gross basis during Q1; on a net basis, it was around ₹34,000 crore. It booked profit to the tune of ₹5,076 crore in Q1FY23, against ₹11,368 crore in Q1FY22. The markets were down, so the corporation did not go for profit-booking in Q1 and instead it brought more during this period as it is a contrarian investor.

"The equity markets have improved now. Therefore, I do not see much volatility happening in that area. We will continue to focus on the non-par segment; we have more non-par products than par products now. Q1 is always slow for the insurance industry, and by that standard, this performance is not as slow as one would have expected. We are confident that growth in new business will be good, going forward," Kumar said.

The business momentum for the corporation has been strong in FY23; as a result, it has gained market share on a first-year premium basis. LIC's market share increased to 65.42 per cent in Q1FY23, from 63.25 in FY22. The yield on investments on policyholders' funds, excluding unrealised gains, for the corporation was 7.74 per cent for the quarter ended June 30, 2022; it was 8.39 per cent in the year-ago period.

Net NPAs in the policyholders' fund saw a substantial decline to ₹9 crore as of Q1FY23 versus ₹194 crore in Q1FY22. The corporation provided ₹26,611 crore for gross NPAs of the tune of ₹26,620 crore. LIC's gross NPA ratio stood at 5.84 per cent as of the June quarter.
